INDEX TO VOL. LXXVI. (B)

Address at Anniversary, November 30, 1904 (Huggins), 1.

Adie (J. R.) and Alcock (A.) On the Occurrence of *Anopheles* (*Myzomyia*) *Listoni* in Calcutta, 319.

Adrenalin, synthesis of substance allied to (Dakin), 491 ; —— physiological activity of substances related to (Dakin), 498.

Alcock (A.) See Adie and Alcock.

Anopheles Listoni in Calcutta (Adie and Alcock), 319.

Apospory, cytology of (Digby), 463.

Arber (E. A. N.) On some New Species of Lagenostoma, a Type of Pteridospermous Seed from the Coal Measures, 245.

Armstrong (E. F.) Studies on Enzyme Action. VII.—The Synthetic Action of Acids contrasted with that of Enzymes. Synthesis of Maltose and Isomaltose, 592 ; —— VIII.—The Mechanism of Fermentation, 600.

Armstrong (H. E.) Studies on Enzyme Action.—Lipase, 606.

Assheton (R.) The Morphology of the Ungulate Placenta, particularly the Development of that Organ in the Sheep, 393.

Assimilation and respiration, vegetable (Blackman and Matthaei), 402.

Atmospheric carbon dioxide, new method for determining (Brown and Escombe), 112.

Auld (S. J. M.) See Henry and Auld.

Barratt (J. O. W.) The Phagocytosis of Red Blood-cells, 524.

Bastian (H. C.) On the Occurrence of Certain Ciliated Infusoria within the Eggs of a Rotifer, considered from the Point of View of Heterogenesis, 385.

Bateson (W.) and Gregory (R. P.) On the Inheritance of Heterostylism in Primula, 581.

Bikhaconitine, pharmacology of (Cash and Dunstan), 468.

Blackman (F. F.) and Matthaei (G. L. C.) Experimental Researches in Vegetable Assimilation and Respiration. IV.—A Quantitative Study of Carbon-Dioxide Assimilation and Leaf-Temperature in Natural Illumination, 402.

Brown (H. T.) and Escombe (F.) On the Variations in the Amount of Carbon Dioxide in the Air of Kew during the Years 1898–1891, 118 ; —— On a New Method for the Determination of Atmospheric Carbon Dioxide, based on the Rate of its Absorption by a Free Surface of a Solution of Caustic Alkali, 112 ; —— Researches on some of the Physiological Processes of Green Leaves, with special Reference to the Interchange of Energy between the Leaf and its Surroundings, 29 ; —— and Wilson (W. E.) On the Thermal Emissivity of a Green Leaf in Still and Moving Air, 122.

Burch (G. J.) On Colour-Vision by very Weak Light, 199.

Cancer, absence or diminution of hydrochloric acid in stomach, wherever growth situated (Moore), 138 ; —— resemblances between "Plimmer's Bodies" and normal constituents of reproductive cells (Farmer, Moore, and Walker), 230.

Carbon dioxide, absorption by caustic alkali, and determination of in air (Brown an Escombe), 112 ; —— variations in amount of at Kew (Brown and Escombe), 118 ; —— assimilation by plants (Blackman and Matthaei), 402 ; —— effect on geotropism in *Pisum sativum* (Drabble and Lake), 351.
Cash (J. T.) and Dunstan (W. R.) The Pharmacology of Indaconitine and Bikhaconitine, 468.
Cell, dual force of dividing. Spindle figure illustrated by magnetic force-chains (Hartog), 548.
Cephalodiscus nigrescens, new species from Antarctic (Lankester), 400.
Cerebellum, relation to decerebrate rigidity (Thiele), 360.
Chitin in carapace of *Pterygotus osiliensis* (Rosenheim), 398.
Coal measures, type of pteridospermous seed from (Arber), 245.
Cobra-venom, influence on proteid metabolism (Scott), 166.
Colour-vision, trichromic (Edridge-Green), 194 ; —— by very weak light (Burch), 199.
Craw (J. A.) On the Physical Chemistry of the Toxin-Antitoxin Reaction : with special Reference to the Neutralisation of Lysin by Antilysin, 179.
Crustacea, colour physiology of higher (Keeble and Gamble), 198.

Dakin (H. D.) The Synthesis of a Substance allied to Adrenalin, 491 ; —— On the Physiological Activity of Substances indirectly related to Adrenalin, 498.
Dale (E.) Further Experiments and Histological Investigations on Intumescences, with some Observations on Nuclear Division in Pathological Tissues, 587.
Dean (G.) An Experimental Enquiry into the Nature of the Substance in Serum which influences Phagocytosis, 506.
Digby (L.) On the Cytology of Apogamy and Apospory. II.—Preliminary Note on Apospory, 463.
Drabble (E.) and Lake (H.) On the Effect of Carbon Dioxide on Geotropic Curvature of the Roots of *Pisum sativum*, L., 351.
Dunstan (W. R.) See Cash and Dunstan.

Edkins (J. S.) On the Chemical Mechanism of Gastric Secretion, 376.
Edridge-Green (F. W.) Two Cases of Trichromic Vision, 194.
Embryo, early, nutrition of (Emrys-Roberts), 164.
Emrys-Roberts (E.) A Preliminary Note upon the Question of the Nutrition of the Early Embryo, with Special Reference to the Guinea-pig and Man, 164.
Emulsin, probable existence in yeast (Henry and Auld), 568.
Enzyme action, studies on (Armstrong), 592, 600, 606.
Erysiphe graminis, endophytic adaptation of (Salmon), 366.
Escombe (F.) See Brown (H. T.) and Escombe.

Farmer (J. B.), Moore (J. E. S.), and Walker (C. E.) On the Resemblances existing between the "Plimmer's Bodies" of Malignant Growths and certain Normal Constituents of Reproductive Cells of Animals, 230.
Fermentation, mechanism of (Armstrong), 600.
Fever, Mediterranean, relation to goats (Zammit), 377 ; (Horrocks), 378.
Foraminifera, relation in size between parent and offspring (Lister), 298.

Gamble (F. W.) See Keeble and Gamble.
Gastric contents, absence of hydrochloric acid in malignant disease of organs other than stomach (Moore), 138.
Gastric secretion, chemical mechanism of (Edkins), 376.

Geotropic curvature in *Pisum sativum*, effect of carbon dioxide on (Drabble and Lake), 351.
Glossina palpalis, anatomy of (Minchin), 531.
Gregory (R. P.) See Bateson and Gregory.

Hartog (M.) The Dual Force of the Dividing Cell. Part I.—The Achromatic Spindle Figure illustrated by Magnetic Chains of Force, 548.
Heape (Walter) Ovulation and Degeneration of Ova in the Rabbit, 260.
Henry (T. A.) and Auld (S. J. M.) On the Probable Existence of Emulsin in Yeast, 568.
Heterogenesis—ciliated infusoria occurring in eggs of rotifer (Bastian), 385.
Heterostylism in Primula, inheritance of (Bateson and Gregory), 581.
Horrocks (Major W. H.) Preliminary Note on Goats as a Means of Propagation of Mediterranean Fever, 378.
Huggins (Sir Wm.) Address delivered at Anniversary Meeting, November 30, 1904, 1.

Indaconitine, pharmacology of (Cash and Dunstan), 468.
Infusoria, occurrence of ciliated, in eggs of rotifer (Bastian), 385.
Innervation, reciprocal, of antagonistic muscles (Sherrington), 160, 269.
Intumescences, experiments and histological investigations on, 587.

Jolly (W. A.) See Marshall and Jolly.

Keeble (F.) and Gamble (F. W.) The Colour-Physiology of the Higher Crustacea.—Part III, 198.
Kidston (R.) Preliminary Note on the Occurrence of Microsporangia in Organic Connection with the Foliage of Lyginodendron, 358.

Lagenostoma, new species of (Arber), 245.
Lake (H.) See Drabble and Lake.
Lankester (E. R.) On a new Species of Cephalodiscus (*C. nigrescens*) from the Antarctic Ocean, 400.
Larmor (J.) Note on the Mechanics of the Ascent of Sap in Trees, 460.
Leaf, energetics of—thermal relation to surroundings, and absorption of solar radiation (Brown and Escombe), 29 ; —— thermal emissivity of in still and moving air (Brown and Wilson), 122.
Leaves in varied illumination, temperature of (Blackman and Matthaei), 402 ; —— physiological processes—assimilation, photosynthesis (Brown and Escombe), 29.
Lipase (Armstrong), 606.
Lister (J. J.) On the Dimorphism of the English Species of Nummulites, and the Size of the Megalosphere in relation to that of the Microspheric and Megalospheric Tests in this Genus, 298.
Lyginodendron, microsporangia of (Kidston), 358.
Lysin, neutralisation by antilysin (Craw), 179.

Macallum (A. B.) On the Nature of the Silver Reaction in Animal and Vegetable Tissues, 217.
Macdonald (J. S.) The Structure and Function of Nerve-Fibres.—Preliminary Communication, 322.
Malta Fever—relation of goats to (Zammit), 377 ; —— (Horrocks), 378.

Marshall (F. H. A.) and Jolly (W. A.) Contributions to the Physiology of Mammalian Reproduction. Part I.—The Œstrous Cycle in the Dog. Part. II.—The Ovary as an Organ of Internal Secretion, 395.
Matthaei (G. L. C.) See Blackman and Matthaei.
Minchin (E. A.) Report on the Anatomy of the Tsetse-fly (*Glossina palpalis*), 531.
Moore (B.) On the Absence or marked Diminution of Free Hydrochloric Acid in the Gastric Contents, in Malignant Disease of Organs other than the Stomach, 138.
Moore (J. E. S.) See Farmer, Moore and Walker.
Mott (F. W.) Observations on the Brains of Men and Animals infected with various Forms of Trypanosomes. Preliminary Note, 235.
Murray (G.) On a New Rhabdosphere, 243.
Muscles, reciprocal innervation of antagonistic (Sherrington), 160.

Nerve fibres, structure and function of (Macdonald), 322.
Nuclear division in pathological tissues (Dale), 587.
Nummulites, dimorphism of English species of (Lister), 298.

Osmotic theory of ascent of sap (Larmor), 460.
Ovary, as an organ of internal secretion (Marshall and Jolly), 395.
Ovulation and degeneration of ova in rabbit (Heape), 260.

Perrin (W. S.) A Preliminary Communication on the Life-history of *Trypanosoma Balbianii*, 368.
Phagocytosis, nature of substance in serum which influences (Dean), 506; —— of red blood-cells (Barratt), 524.
Placenta, morphology of ungulate (Assheton), 393.
"Plimmer's Bodies" of malignant growths, resemblances to normal constituents of reproductive animal cells (Farmer, Moore, and Walker), 230.
Primula, inheritance of heterostylism in (Bateson and Gregory), 581.
Pterygotus osiliensis, chitin in carapace of (Rosenheim), 398.

Reproduction, physiology of mammalian (Marshall and Jolly), 395.
Respiration and assimilation, vegetable (Blackman and Matthaei), 402.
Rhabdosphere, new species of (Murray), 243.
Rosenheim (O.) Chitin in the Carapace of *Pterygotus osiliensis* from the Silurian Rocks of Oesel, 398.

Salmon (E. S.) On Endophytic Adaptation shown by *Erysiphe graminis* DC. under Cultural Conditions, 366.
Sap in trees, mechanics of ascent of (Larmor), 460.
Scott (James) The Influence of Cobra Venom on the Proteid Metabolism, 166.
Sherrington (C. S.) On Reciprocal Innervation of Antagonistic Muscles.—Seventh Note, 160; Eighth Note, 269.
Silver reaction in animal and vegetable tissues, nature of (Macallum), 217.
Sleeping sickness, changes in lymphatic glands and central nervous system (Mott), 235.
Spinal cord, relationship with optic thalamus and Deiter's nucleus (Thiele), 360.
Spirillum Theileri, transmission and inoculability of (Theiler), 504.

Theiler (A.) Transmission and Inoculability of *Spirillum Theileri* (Laveran), 504.
Thiele (F. H.) On the Efferent Relationship of the Optic Thalamus and Deiter's Nucleus to the Spinal Cord, with Special Reference to the Cerebellar Influx Theory and the Genesis of Decerebrate Rigidity, 360.

Thomas (H. W.) The Experimental Treatment of Trypanosomiasis in Animals, 589.
Toxin-antitoxin reaction, physical chemistry of (Craw), 179.
Trypanosoma Balbianii, life history of (Perrin), 368.
Trypanosoma-infected brains, observations on (Mott), 235.
Trypanosomiasis in animals, experimental treatment of (Thomas), 589.
Tsetse-fly, report on anatomy of (Minchin), 531.

Vision, two cases of trichromic (Edridge-Green), 194 ; —— colour-vision by weak light (Burch), 199.

Walker (C. E.) See Farmer, Moore and Walker.
Wilson (W. E.) See Brown (H. T.) and Wilson.

Yeast, probable existence of emulsin in (Henry and Auld), 568.

Zammit (T.) A Preliminary Note on the Susceptibility of Goats to Malta Fever, 377.

END OF THE SEVENTY-SIXTH VOLUME (SERIES B).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
